Đà Nẵng

EDUCATION

Software Engineer

2022 - 2026

DUY TAN UNIVERSITY

GPA: 3.15/4.0

TESTING SKILLS

Software Testing (Manual Testing)

Test Case Design & Execution

Bug Reporting & Bug Tracking

Requirement Analysis

API Testing (Postman)

Functional Testing

UI Testing

TECHNICAL & SKILLS

FRONTEND: ReactJS, JavaScript, TailwindCSS, Ant Design.

BACKEND: Node.js, Express.js, RESTful API.

DATABASE: MongoDB, SQL.

TOOLS: Postman, Github, Jira

CAREER GOALS

I am seeking a QA/Tester position where I can leverage my experience in manual testing, API testing, and system analysis to deliver high-quality software. I am eager to contribute to product quality while continuously enhancing my skills in a professional working environment.

EXPERIENCE

Intern QA **03/2026 - Present**

AntBuddy

• Analyzed requirement documents (BRD, SRS, User Stories) to design test cases and test scripts for real-world client projects including **Long Châu, TokyoLife**, **Zalo Mini App sales platform**, and internal **CRM** system.

• Designed and executed test cases covering **functional**, **regression**, and **black-box testing** across multiple client projects, identified and reported defects with detailed reproduction steps

• Collaborated closely with developers to **reproduce issues** and **verify bug fixes** within **sprint cycles.**

• Participated in **quality assurance activities** before each **product release** and handover to ensure delivery standards.

• Tested **Web and Mobile applications** for retail and **CRM platforms** across multiple browsers and devices

PROJECT

Graduation Project **25/09/2025 - 24/12/2025**

Building an e-commerce website using MERN STACK technology with integrated AI chatbot for purchasing support.

- Independently handled both **development and QA roles**, ensuring product quality through structured **test planning** and **execution**.
- Design **test scenarios** and write **test cases** based on system requirements.
- Designed and executed **80+ test cases** covering core features such as **authentication**, **cart**, and **payment**, and identified multiple **functional defects**.
- Test for exceptions and invalid **input data**, **empty fields**, **unauthorized access**, and incorrect payment data.
- Conduct **API testing** for **CRUD operations** using **Postman** and verify **payment integration** in the **VNPAY sandbox** environment.
- Perform **logic testing** for **role-based access control** (Administrator/ Sub-Administrator/ Customer/ Visitor)
- Perform **UI testing** on both **mobile** and **desktop** devices
- Documented bugs with **reproduction steps** and **expected vs actual results** for self-review and quality assurance.

SOFT SKILLS

- Meticulous and detail-oriented
- Persistent and patient in finding defects
- Strong teamwork and communication skills
- Analytical thinking and problem-solving ability
